Forward-Looking Statements Disclosure

This presentation contains forward-looking statements. Forward-looking statements are generally identifiable by the use of words like "may," "will," "should," "could," "expect," "anticipate," "estimate," "believe," "intend," "outlook," or "project" or the negative of these words or other variations on these words or comparable terminology. All statements other than statements of historical or current fact are, or may be deemed to be, forward-looking statements. The reader is cautioned not to put undue reliance on these forward-looking statements, as these statements are based upon the current beliefs and expectations of management and are subject to numerous risks and uncertainties outside of the Company's control that can cause actual outcomes and results to differ materially. These risks and uncertainties include, but are not limited to: the adequacy of the Company's liquidity to pursue its complete business objectives; the Company's ability to obtain reimbursement from third party payers for its products; loss or retirement of key executives; adverse economic conditions or intense competition; loss of a key supplier; entry of new competitors and products; adverse federal, state and local government regulation; technological obsolescence of the Company's products; technical problems with the Company's research and products; the Company's ability to expand its business through strategic acquisitions; the Company's ability to integrate acquisitions and related businesses; price increases for supplies and components; the effects of current and future U.S. and foreign trade policy and tariff actions; or the inability to carry out research, development and commercialization plans. In addition, other factors that could cause actual results to differ materially are discussed in the Company's filings with the SEC. Investors and security holders are urged to read these documents free of charge on the SEC's web site at <http://www.sec.gov>. The Company undertakes no obligation to publicly update or revise its forward-looking statements as a result of new information, future events or otherwise.

Use of Non-GAAP Financial Measures

This presentation includes the non-GAAP financial measures of Adjusted EBITDA, which differ from financial measures calculated in accordance with U.S. generally accepted accounting principles (“GAAP”). These non-GAAP financial measures are presented because we believe they are useful indicators of our operating performance. Management uses these measures principally as measures of our operating performance and for planning purposes, including the preparation of our annual operating budget and financial projections. We believe Adjusted EBITDA is useful to investors as supplemental information because they are frequently used by analysts, investors and other interested parties to evaluate companies in our industry. We believe these non-GAAP financial measures are useful as measures of comparative operating performance from period to period. In addition, Adjusted EBITDA is used as a performance metric in our compensation program. Set forth in the Appendix to this presentation, we have provided reconciliations of these non-GAAP financial measures to the most directly comparable GAAP financial measures. Investors and other readers are encouraged to review the related GAAP financial measures and the reconciliations of the non-GAAP measures to their most directly comparable U.S. GAAP measures set forth in the Appendix, and investors and other readers should consider non-GAAP measures only as supplements to, and not as substitutes for or as superior measures to, the measures of financial performance prepared in accordance with GAAP.

Tactile Medical Snapshot

- + Focused on treating chronic diseases at home
 - Therapeutic focus on chronic swelling conditions
- + Q1 2019 revenue of \$37.6M (↑40% YoY)
- + 2018 revenue of \$143.8M (↑32% YoY); gross margin of 71%; profitable
- + 2019 revenue outlook of \$180.0M-\$182.5M, representing revenue growth of 25%-27% YoY
- + Cost-effective, clinically differentiated products
 - Flexitouch[®] Plus and Entre[™] systems (for lymphedema)
 - Airwear Compression Wrap (for venous ulcerations)
- + Direct-to-patient and -provider model that disintermediates durable medical equipment dealers (DMEs)
- + Significant infrastructure that is difficult to replicate
- + \$4B+ addressable U.S. market opportunity

Lymphedema | Condition and Treatment Limitations

What is Lymphedema?

- + Chronic swelling from damage to the lymphatic system
- + Caused by chronic venous insufficiency, cancer treatment, obesity, infection, trauma, surgery or congenital malformation of the lymphatic system
- + Progressive in nature; no known cure
- + Severely debilitating, both physically and psychologically
- + Often misdiagnosed
- + Standard of care is therapist-delivered manual lymphatic drainage and compression therapies

Limitations of Current Treatments

- + Daily in-clinic therapy for 4-6 weeks
 - Therapist-delivered massage
 - Bandaging, skin care
- + Followed by self-performed manual lymphatic drainage
- + Difficult to access skilled therapist care
- + Reimbursement for physical therapy often capped

Not a Feasible Long-term Solution

Lymphedema | Tactile Medical's Solutions

At-home Pneumatic Compression Therapy to Treat Lymphedema and Venous Disorders

Advanced Model

FLEXITOUCH® PLUS

- + Extends clinic-based therapy by automated self-manual lymphatic drainage at home
- + Reduces swelling, fibrosis and infection risk

Basic Model

ENTRE™

- + Solution for patients that do not require or do not yet qualify for advanced pneumatic compression therapy

Clinically Effective, Home-based Products in an Era of Cost Containment

Flexitouch Plus System

Overview

- + Programmable controller unit with 18 treatment settings
- + Up to 32 air chambers in the adjustable garments; treats the torso, chest, arms, legs, head and neck

Clinically Proven Benefits

Mechanism

- + Stimulates the lymphatic system

Impact

- + Reduces edema and lymphedema associated with chronic venous insufficiency, cancer and surgery/trauma

Benefits

- + Reduction of pain, improvement of skin integrity

Clinical Outcomes

- + Improved clinical outcomes compared to basic pneumatic compression devices

Patient Satisfaction

- + 90% rate and 95% treatment compliance

Significant, Growing Lymphedema Market Opportunity

Note: Addressable market opportunity assumes Flexitouch ASP multiplied by number of diagnosed patients in U.S. in TTM ending Dec2018. Claims data trails 6 months behind date of analysis.

Head and Neck Lymphedema Market Opportunity

U.S. H&N Cancer Prevalence and Incidence

- U.S. patients with H&N cancer
- New U.S. patients with H&N cancer diagnosed annually (Both per American Cancer Society)

H&N Lymphedema

- U.S. patients with post-treatment lymphedema (>75%)*

Venous Leg Ulcers | Condition and Treatment Limitations

What are Venous Leg Ulcers (VLUs)?

- + Open wounds caused by tissue breakdown due to Chronic Venous Insufficiency (CVI)
- + Debilitating physically and psychologically
- + 30-40% of VLUs not responsive to treatment > 6 months
- + Standard of care is compression therapy and multilayered bandages

Limitations of Current Treatments

- + Recurring trips to wound clinic over months
- + Bandages are worn continuously and reapplied weekly
- + Time-consuming and inconvenient therapy
- + Limits daily activities
- + Inconsistent therapy due to imprecise pressure

Costly and Burdensome Standard of Care

Airwear Compression Wrap

- + Adjustable air compression for patients with venous insufficiency, lymphedema and venous ulcerations
- + Designed to improve patient compliance
 - Easy to apply – even at high levels of compression (40-50mmHg)
 - No compression to “fight” at application (unlike stockings)
 - Does not rely on patient strength to create compression (unlike most wraps)
 - Calibrated for consistent application of therapeutic compression
- + Comparable performance to standard of care¹
- + For all day use—discretely under clothes

Flexitouch Significantly Reduces Adverse Events and Cost of Care

Groundbreaking Cost Effectiveness Study Published

Flexitouch® System Clinical Evidence

Journal of the American Medical Association (JAMA) Dermatology – Study Highlights

A study of 718 lymphedema patients evaluating patient health outcomes and healthcare costs in cancer and non-cancer cohorts.

Source: Karaca-Mandic P, Hirsch AT, Rockson SG, Ridner SH. (2015) The Cutaneous, Net Clinical, and Health Economic Benefits of Advanced Pneumatic Compression Devices in Patients with Lymphedema. *JAMA – Dermatology*, Oct. 2015.

1. For Cancer-Related Patients | 2. Excluding Medical Equipment | 3. For Non-Cancer-Related Patients | 4. Not Statistically Significant

First of its Kind Evidence of Cost Benefits

Demonstrated Cost Benefits vs. Other Treatment Modalities

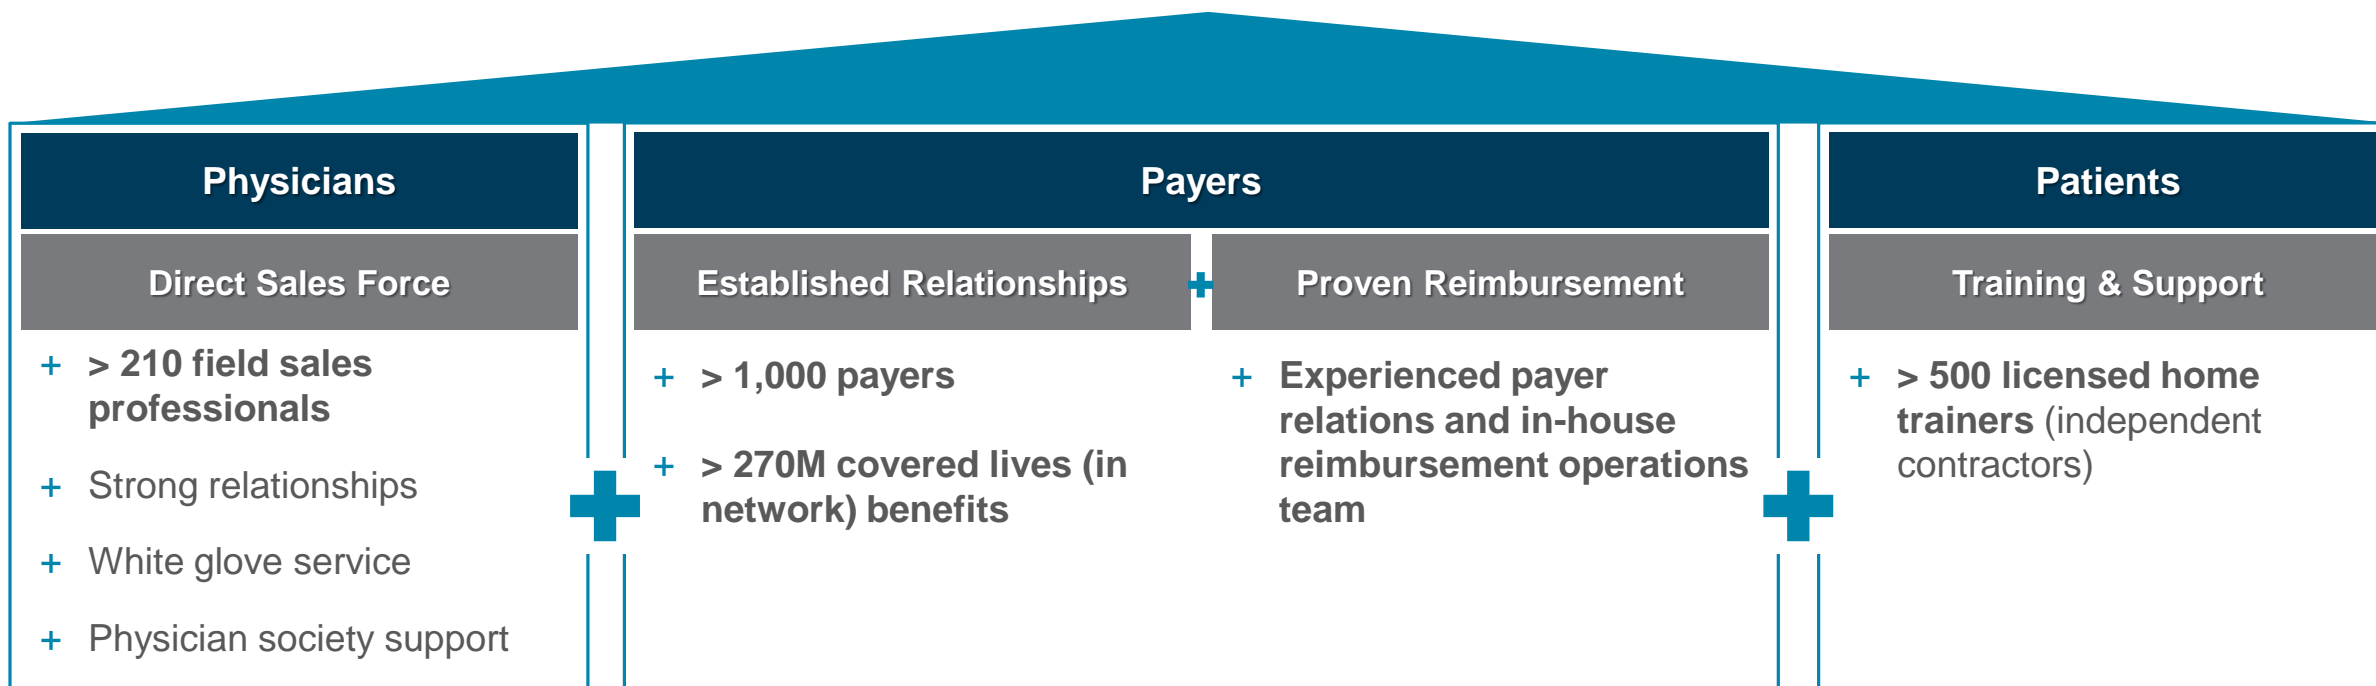

+ Conservative therapy plus Flexitouch use was associated with:

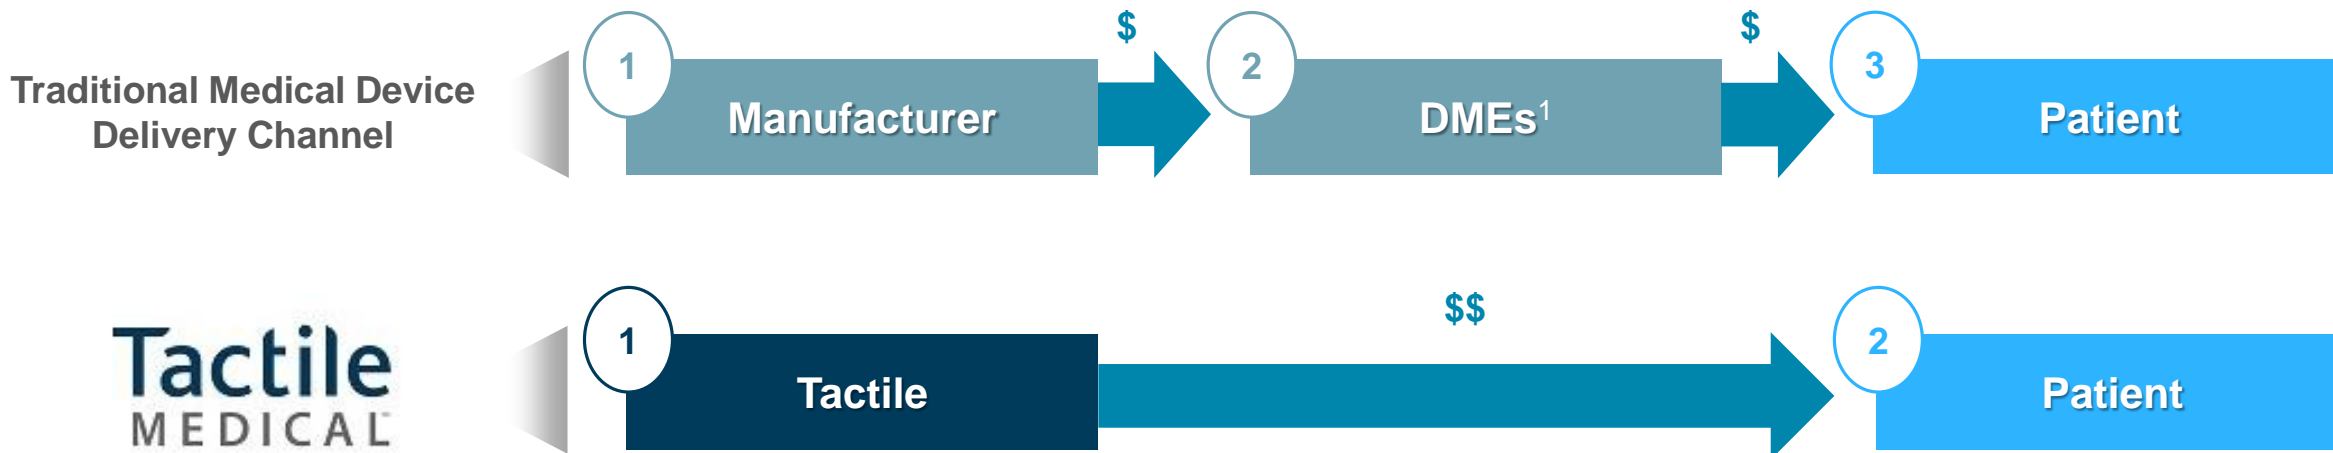

- 69% reduction in per patient per year (PPPY) costs vs. conservative therapy alone
- 85% reduction in PPPY costs vs. conservative therapy plus simple PCDs
- 53% reduction in PPPY costs vs. conservative therapy plus competitive advanced PCDs

Invested to Build a Strong Distribution Infrastructure

Differentiated Distribution Model

Overview of Direct Sales Platform

- + **Model bypasses conventional DMEs channel**
 - Bill and collect directly from payers and patients (co-pay)
 - Appeal denials, advocate for patient
- + **> 210 field sales professionals**
 - Control of clinical call point; message, service, workload
- + **Network of > 500 independent licensed professional home trainers**

Target Call Points

- + **Call points**
 - Lymphedema clinics
 - Vascular and venous care clinics
 - Wound care clinics, podiatrists
 - VA hospitals
- + **Deep relationships with physicians, nurses and therapists**

¹ Durable Medical Equipment dealers (DMEs)

Operational Excellence in Reimbursement and Payer Relations

Strategic Expertise and Operational Proficiency

+ In-house reimbursement operations group

- Streamlined process — initial order to final bill
- Insurance verification and authorization
- Billing and collections
- Customer support services

+ Payer Relations group

- Health plan, DME and clinical backgrounds
- Payer messaging, coverage policies, contracting
- Develop relationships and coverage policies with payers
- Manage Medicare strategy and patient claims
- Advocacy liaison

High Payer Approval Rates

Pillars of Differentiation

Tactile
MEDICAL

Unique Go-To-Market Distribution

- + Direct access to prescribers, patients, and payers
- + Disintermediates “middleman,” captures strong gross margins
- + Over 210 employee sales reps, over 500 contract trainers

Extensive Clinical & Economic Evidence

- + Only therapy demonstrating reduced costs of care
- + Broad clinical support behind products including 22 completed studies on more than 2,100 patients
- + Improved patient outcomes and quality of life

Proprietary Products

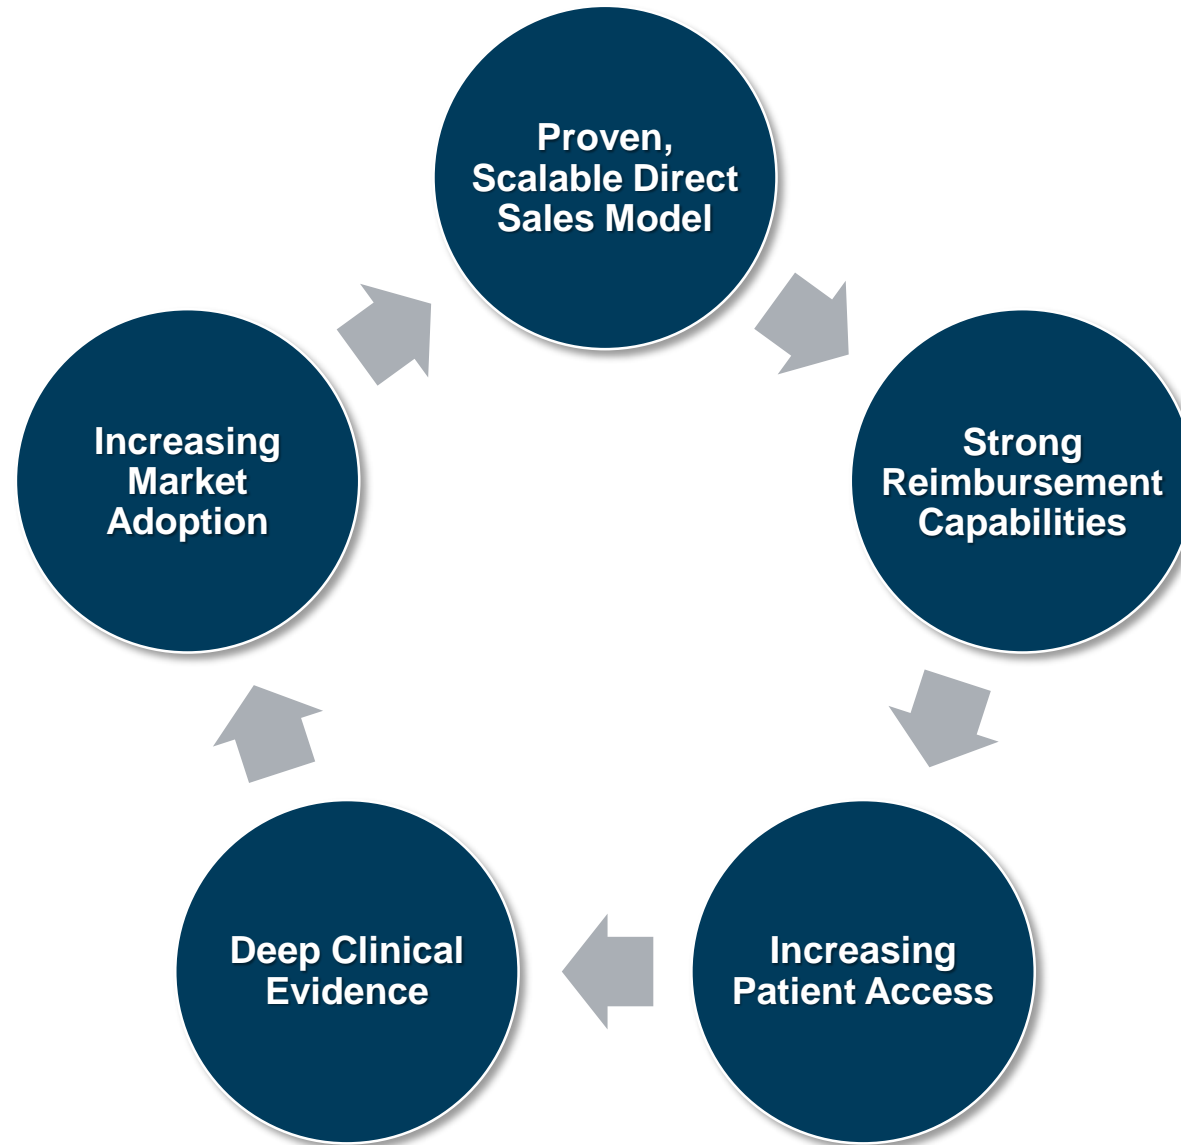

- + Expanded indications for use unique to TCMD (e.g., Head & Neck)
- + Regular product enhancements to add functionality and take out costs
- + Strong IP in US, EU, and Asia

Reimbursement Expertise

- + >270M covered lives under contract as in-network
- + Direct billing lifts burden of reimbursement from clinicians and patients
- + Advocate for patients and clinicians; appeal denied claims
