

Tactile Medical Introduces New ComfortEase™ Flexitouch® Plus Garments and Kylee™ Mobile Application

July 25, 2022

Flexitouch Plus garments redesigned to improve the patient experience; the Kylee app empowers patients through digital health monitoring

MINNEAPOLIS, July 25, 2022 (GLOBE NEWSWIRE) -- Tactile Systems Technology, Inc. ("Tactile Medical") (Nasdaq: TCMD), a medical technology company focused on developing medical devices for the treatment of patients with underserved chronic diseases at home, announced today the full market release of its new ComfortEase™ garments, part of the Flexitouch® Plus system. In addition, Tactile Medical is putting the power of lymphedema health tracking in the palm of patients' hands with the launch of its Kylee™ mobile application.

Enhancing the Patient Experience with ComfortEase

Leveraging over 18,000 points of feedback from patients and therapists, Tactile Medical redesigned the Flexitouch Plus garments to be easier to use, better fitting and more comfortable, all intended to improve patient experience and satisfaction. Together with the Flexitouch Plus controller, the ComfortEase garments provide patients with an effective system for at-home therapy and symptom relief of lymphedema, a condition which requires diligent daily management.

Empowering Patients Through Digital Health Monitoring

Patients using the Flexitouch Plus system, as well as those who are undiagnosed and concerned about their swelling, now have access to the Kylee mobile application. This application expands Tactile Medical's ability to serve patients on their journey to diagnosis. Kylee, a personal lymphedema assistant, is available on both the iOS and Android platforms, and is intended to help educate, manage symptoms and support patients to help them get the most out of their therapies. The app enables users to record their symptoms and treatments, and upload photos to track changes over time. Kylee app users may also show their progress to their doctor, which can lead to more informed conversations. The free app includes Flexitouch Plus and Entre shipment and order tracking, product tutorial videos and an education library which provides helpful information about lymphedema and symptom management.

"At Tactile Medical, we are driven to treat patients with underserved chronic conditions and help them care for themselves at home. The release of the ComfortEase garments and the Kylee app marks an important step in furthering our Mission," said Kristie Burns, Senior Vice President of Marketing & Clinical Affairs.
